TAKING THE BOAT OUT AND PUTTING IT IN THE WATER WITH THE TRAVEL LIFT

The company Azimut d.o.o. is a company with its seat in Šibenik, a city situated in the centre of Dalmatia or the Adriatic Sea in D-MARIN Mandalina Šibenik; it was founded in 2010 and is 100% privately owned.

The company deals only with the maintenance and repair of yachts and boats. It offers the service works in service center in D-marin Mandalina -Šibenik, and in the Tribunj and in the marina Kremik in Primošten.

The company Azimut d.o.o. is the authorized boat repairer for maintenance and repair of boat engines pursuant to the certificate of Croatian Register of Ships **HRB/CRS**, and the company has also the certificate pursuant to **ISO 9001:2009 system** in managing the organization quality relating to the scope of activities **Maintenance and Repair of Vessels, Installation of Machines and Equipment of the Vessel**, in accordance with the requests of the standard **HRN EN ISO 9001:2009**.

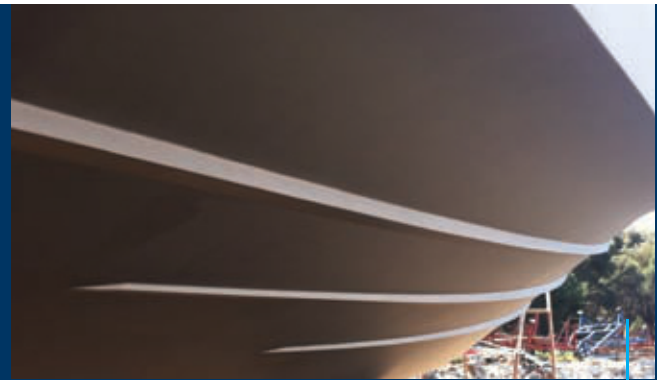

The company Azimut d.o.o. is a member of the authorized repairers' group of the Republic of Croatia, as well as the occupational association of the authorized repairers of vessels in Šibenik – Knin County.

BRUŠENJE PODVODNOG DIJELA PLOVILA TE PRIPREMA ZA BOJANJE ANTIFOULIGA

Nakon faze dizanja plovila, slijedi visokotlačno pranje podvodnog dijela, te viziranje plovila na mjesto gdje se vrše ostali radovi. Zatim slijedi brušenje podvodnog dijela plovila te priprema za nanošenje antifouling premaza. Također vršimo sanaciju oštećenja na trupu plovila, kao i uklanjanje naslaga starih premaza antifoulinga te stare boje na trupu te sanaciju i zaštitu postupkom koji je propisan za zaštićivanje podvodnog dijela plovila. Vršimo i sanaciju osmoze na plastičnim plovilima.

ABRASION OF THE UNDERWATER HULL AND PREPARATION FOR ANTIFOULING COATING

Once a boat has been taken out of the water, underwater hull is cleaned with a high-pressure pump, and the boat is sighted at the place where the rest of the maintenance works are performed. After that, the underwater hull is abraded and prepared for the antifouling coating. We also perform the repairs of various kinds of hull damage, as well as the removal of layers of old coats of antifouling and paint on the hull, repairs and protection, according to standardised procedures of underwater hull protection. Repairs of osmosis on the plastic boats are also performed.

Primer faza zaštite Primer protection

Matiranje podvodnog dijela Making of the underwater hull matt

Skidanje naslaga do gealcoata Removing of the layers to gelcoat

Nanošenje antifoulinga Antifouling coating

Poslije ugradnje After the installation

Ugradnja boathrustera Boat thruster installation

Poslije popravka After the repair

POPRAVAK OŠTEĆENJA TRUPA I UGRADNJA BOATHRUSTERA

Popravlak oštećenja trupa plovila, plastificiranje oštećenja, nanošenje gelcota, završna obrada. Vršimo sanaciju tikove palube i ostalih tikovih dijelova

Vršimo ugradnju pramčanih i krmenih propelera. Boathruster i sternthruster.

HULL DAMAGE REPAIRS AND BOAT THRUSTER INSTALLATION

Repairs of various types of damage in the boat hull, plastic coating of various types of damage, gelcoat coating, final treatment. Repairs of teak decks and other parts in teak wood are performed.

We install stem and stern propellers. Boat thruster and stern thruster.

VISOKO SJAJNO POLIRANJE I NANOŠENJE VOSKA

Najčešće koristimo 3M program za poliranje i nanošenje voska. Plovila prvo detaljno odmastimo te ovisno o stanju plovila poliramo u više ili manje ponavljanja, zatim slijedi nanošenje zaštitnog voska na trup i nadgrađe te završno poliranje inoxa.

Prije nego plovilo ide nazad u more vrši se kompletno završno pranje te priprema za primopredaju plovila vlasniku.

POLISHING AND WAXING

3M programme for polishing and waxing is used in most cases. The ships are firstly cleaned of grease in detail and depending on the state of each vessel, the process of polishing is performed several times, after that, the hull and superstructure are waxed with a protective wax and stainless steel parts are polished.

Before the boat is put in the sea again, it is washed and prepared so it can be returned to the owner.

Vađenje osovina Taking out of shafts

Balansiranje propelera i zmjena ležajeva
Propeller balancing and bearing replacement

Utvrđivanje oštećenja
